Printable Magazine Fitment Template

Umarex Notos / Snowpeak PP750 Mega Capacity Magazine

IMPORTANT: PRINT AT 100% / ACTUAL SIZE

Do not use "Fit", "Shrink", or "Scale to Fit".

CUT ALONG THE OUTER PROFILE

The internal circle represents the path for the pellet and loading probe.

PRINT SCALE CHECK

100 mm

Measure this line with a ruler before cutting. It must measure exactly 100 mm.

How to use:

1. Print this PDF at 100% / Actual Size.
2. Measure the 100 mm scale-check line above.
3. Cut carefully along the outer magazine profile and the pellet/probe passage as needed.
4. Use the paper cutout to check available clearance and approximate fitment in your airgun.

This 2D paper template is intended as a preliminary fitment check only. It cannot reproduce 3D features of the actual magazine. We recommend leaving at least 2mm of clearance between the template and your scope.
